MY SKILLS

Languages: Ruby, Javascript

Web Development: REST APIs, AJAX, HTML5, CSS3, jQuery, Bootstrap

Technologies: Rails, Node, Redux, Handlebars.JS, Sinatra, React, Raspberry Pi, FB Messenger Bot, Electron

Databases & Tools: git, PostgreSQL, SQLite3, Active Record

APIs: Twilio, Kairos, Snowboy, Alexa Voice Services

Design Tools: Photoshop, Sketch, InVision, Illustrator, Indesign, Premiere Pro, After Effects

MY PROJECTS

RFLCT - IoT

Lead developer and technical architect on RFLCT, a voice-activated smart mirror built with Electron, Node, Alexa Voice Services, facial recognition and voice-command API's, and a Raspberry Pi to display time, weather, headlines and other helpful information to users.

Github Battle Arena - Web App

A Node powered game built in React that pits two Github users against each other by fetching their public data from the Github API in order to determine the superior programmer.

ACCOMPLISHE - Web App

Front-end lead and designer on a Ruby on Rails app that helps women track their moments of success and growth in the workplace. Third Place Winner at Lady Problems Hackathon, SF 2016.

Kelvn - Web App

A Sinatra web app that uses the Twilio API to schedule daily, annoying birthday texts to your loved ones and enemies.
