

SEAN LEE

Developer / Designer / Marketer

Hey Hi Hello!

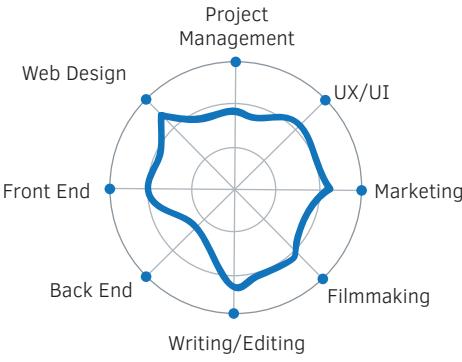

A creative at heart with a passion for design and technology, I'm drawn towards projects which use bold, beautiful design choices to improve human/computer interaction.

I have a diverse skill set in marketing, visual exploration, filmmaking and have recently added programming and web development to my repertoire of skills.

Why don't we work together?

MY SPECIALTIES

MY EXPERIENCE

April 2016 - Sept 2016

Student - Full Stack Web Developer

Dev Bootcamp

18 week programming intensive specializing in Ruby, Rails, Sinatra, JavaScript, jQuery (AJAX), SQL, Git, Object-Oriented Design, Test Driven Development, Heroku and Agile Development.

July 2015 - Dec 2015

Marketing Strategist

247 INC.

Lead for all branding, marketing, go-to-market strategy, product development, visual design and content creation.

May 2014 - Aug 2014

Digital Account Manager

Extreme Reach

Provided customer solutions for adtech partners while designing UX/UI improvements to customer facing tools.

May 2013 - Aug 2013

Creative/Strategy Intern

AR New York

Fashion advertising boutique. Copywriting, design and strategy were my primary responsibilities.

MY PROJECTS

RFLCT - IoT

I was team lead on RFLCT, a voice-activated smart mirror with facial recognition that displays time, weather, headlines, and other helpful information to users in a beautiful interface that integrates seamlessly with our custom built mirror.

Eliza - Chatbot

A Facebook messenger chatbot that pings you with inspirational quotes, meditative exercises, and thought provoking questions. GIF's, emojis and whimsical copy keep things light hearted.

ACCOMPLISHE- Web App

Third Place Winner at Lady Problems Hackathon, SF 2016. It helps women track their moments of success, power and growth in the workplace so that they have a clear sense of what they bring to the table.

Kelvn - Web App

A fun web app that uses the Twilio API to schedule daily, annoying birthday texts to your loved ones and enemies.

MY SKILLS

Languages: Ruby, Javascript, familiar: Python

Web Development: REST APIs, AJAX, HTML5, CSS3, jQuery, Bootstrap

Technologies: Rails, Node, Redux, Handlebars.JS, Sinatra, React, Unity, Raspberry Pi, FB Messenger Bot, Electron

Databases & Tools: git, PostgreSQL, SQLite3, Active Record

APIs: Twilio, Kairos, Snowboy, Alexa Voice Services

Design Tools: Photoshop, Sketch, InVision, Illustrator, Indesign, Premiere Pro, After Effects
